

You Won't Believe These Auto Rates

Mortgage loans are the backbone of DOY's loan portfolio. The income generated from these loans has enabled DOY to provide high dividends to its savers and help fund the many services offered by DOY. As a means to reward these members a special promotion began in January. A special mailing will be sent out to all the mortgage loan members to offer them and their family members (who are eligible for membership) with very low auto loan rates. If you have or had a mortgage loan with DOY, you or any of your family members that are in the market for a new or used car (*only certain years & models*), should check with DOY first. The promotional rates began on January 1, 2016. This promotion also applies to any member who had a paid off mortgage loan within the past ten years (*stipulation: the mortgage loan must have been held by DOY long enough to have at least 60% of the original principal paid off*).
