

Upper Tier Reaches 1.00%

Again due to strong financial performance this past quarter, DOY has again increased the dividends in all tiers. First and second quarters' loan demand have increased sufficiently to not only maintain DOY's high dividend rates but increase them as well. Also, there has been a slight increase in DOY's short-term investments' interest rates helping to increase the overall net income for the quarter. This has prompted the Board to again increase the dividends this time by 0.05% in every tier. With this increase the dividends for the past two quarters have increase by 0.15% (see rate chart below). With these rates DOY's upper tiers again outdistance most short-term CD rates (one year or less) in our area. Just remember, *great participation provides great rates!!!*

Note: Institution rates remain the same as last quarter.
